MIRRORING360 PRO

by Splashtop®

Mirror device screens to any PC

Share your PC screen to up to 40 devices

Mirroring360 lets you wirelessly share Chromebook, iPad, iPhone, Android, Windows and Mac screens without the need for cables, Apple TV, Chromecast or Bonjour.

Start sharing your work, your ideas, and your apps by using Mirroring360!

In the classroom

Teachers and students can share any content from their devices to the classroom computer and, if connected, to the projector or interactive whiteboard. Turn students into presenters without them moving from their seats. Great for professional development. Ideal for 1:1 and BYOD

Features

- **Mirror up to 4 device screens** simultaneously – wirelessly. This can be any mix of devices
- **ViewIt.At** feature allows up to 40 in-room or remote participants to view the session in their own browsers. No downloads or installs required to view – join instantly!
- **Use a QR code or 9-digit ID** to allow participants to quickly and easily connect
- **Add favorites** to save frequent connections
- **Use the Mirroring Assist app** for iOS and Android to eliminate the need to use Bonjour
- **Connection control** - Add a password to restrict connections, close a connection, set resolution, change computer name, turn off Bonjour
- **Large deployment features** - msi package with options to preset default configurations, organizational license key for easy management
- **Screen recording** – record mirroring sessions

> *"Using Mirroring360 in an instructional setting has shown a direct increase in engagement among our students."*
>
> - Matt Penner, Director of Information and Instructional Technology, Val Verde Unified School District

Computer displays QR code and Session ID

Connect from Chromebook, Mac or PC using Mirroring360 Sender for Chrome

Connect from iOS or Android using Mirroring Assist app

To Mirror:

- Install Mirroring360 Pro onto your PC

- Start Mirroring from devices:

  - From iOS devices - turn on AirPlay + Mirroring. Optionally download the Mirroring Assist app from the App store to use a QR/Session ID.
  - From Android devices - install the Mirroring360 Sender app from Google Play
  - From a Chromebook, PC or Mac - install the Mirroring360 for Chrome extension from the Chrome webstore

To Share:

- Install Mirroring360 Pro onto your PC

- Start Sharing your PC screen

  - Click the ViewIt.At button to share
  - Wait for the clipboard button to be enabled and click to copy the ViewIt.At URL to clipboard.
  - Send the ViewIt.At URL to other device users through email or other messaging programs.
  - By clicking the URL, other users can now start viewing your computer screen in a browser.
